

A B S T R A C T

A SYSTEM AND A METHOD FOR USE ON A TERMINAL TO MANAGE AN ARCHITECTURE DEDICATED TO A COMMUNICATIONS NETWORK

5

System for managing at least one architecture (15, 16, 17, 18) of a terminal (10) dedicated to a communications network (40, 41, 42, 50, 51, 52), said terminal (10) including at least one user interface (11).

- 10 According to the invention, connections to said communications networks (40, 41, 42, 50, 51, 52) being set up via a mobile network, said system comprises at least one dedicated architecture manager (24) integrated into said terminal (10), adapted to manage at least one 15 architecture (15, 16, 17, 18) dedicated to a communications network (40, 41, 42, 50, 51, 52), and adapted to process simultaneously the operation of said terminal (10) when connected to a plurality of said communications networks (40, 41, 42, 50, 51, 52).
20 Application to the simultaneous management of access to a plurality of communications networks offering a set of services from a terminal connected to a public mobile network to which the user is a subscriber.

(54) Title: SYSTEM AND METHOD OF MANAGING COMMUNICATION NETWORK-DEDICATED ARCHITECTURE ON A TERMINAL

(54) Titre : SYSTEME ET PROCEDE DE GESTION SUR UN TERMINAL DE L'ARCHITECTURE DEDIEE A UN RESEAU DE COMMUNICATION

RESEAU MOBILE : MOBILE NETWORK

ENSEMBLE DE SERVICES : GROUP OF SERVICES

(57) Abstract: The invention relates to a system of managing at least one architecture (15, 16, 17, 18) on a terminal (10), which is dedicated to a communication network (40, 41, 42, 50, 51, 52), said terminal (10) comprising at least one user interface (11). According to the invention, the connection to the aforementioned communication network (40, 41, 42, 50, 51, 52) is established via a mobile network. The inventive system comprises at least one dedicated architecture handler (24) which is built into the terminal (10), which can handle at least one communication network (40, 41, 42, 50, 51, 52)-dedicated architecture (15, 16, 17, 18) and which can simultaneously process the operation of the terminal (10) which is connected to several of said communication networks (40, 41, 42, 50, 51, 52). The invention can be used for the simultaneous management of access to several communication networks providing a group of services from a terminal which is connected to a public mobile network to which the user is subscribed.

(57) Abrégé : Système de gestion sur un terminal (10) d'au moins une architecture dédiée (15, 16, 17, 18) à un réseau (40, 41, 42, 50, 51, 52) de communication, ledit terminal (10) incluant au moins une interface utilisateur (11). Selon l'invention, la connexion audit réseau (40, 41, 42, 50, 51, 52) de communication étant établie via un réseau
